fact:sheet

Eucon is a solutions provider for business performance management and a specialist in added value information systems. Customers in automotive aftersales and the insurance industry choose Eucon to achieve improvements in their business processes.

At the moment 200 employees are working for the company which is growing considerably.

management deeply. It was important to us, that automatic keyword extraction allows to consider individual tags in search facets.

Furthermore for reasons of data security, it is important to us to store our customers' information, which are confidential in great parts, in-house only.

"We have been studying the European market of enterprise search and information

management deeply. It was important to us, that automatic keyword extraction allows to consider individual tags in search facets.

With their product inter:gator, interface:projects met our expectations concerning the upper mentioned challenge and a lot of other points as well as financial aspects.

We have been using inter:gator for one year now successfully and our employees like it," says Ruth Zeddies, who is responsible for the research center.

Striking is the drastic increase of efficiency on instructing new employees.

Questions concerning paths or locations of documents get very rare due to the implementation of social-search-functionality.

Relevant search results, documents in work process or the company-wide rss-feed can be reached on inter:gator dashboard quickly and easily.
